

# Malta Vision 2050

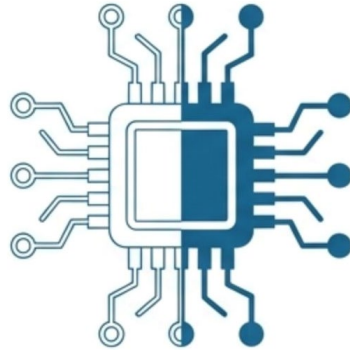

Designing a Healthy Quality of Life for All

An overview of Malta's roadmap for the next 25 years

# The world is changing faster than ever

To thrive amidst climate change, digital transformation, and global shifts, Malta is looking beyond the next political cycle. Malta is planning for the next generation.

**Long-term thinking is not a luxury - it is a necessity**

# Redefining Success as a Nation

## Traditional Progress

**Metric:** Progress measured by GDP output alone.

**Approach:** Siloed, sector-specific strategies operating independently.

**Timeline:** Short-term planning tied to immediate cycles.

## The Vision 2050 Way

**Metric:** Progress measured by well-being, health, and life satisfaction.

**Approach:** One unified, coherent national framework.

**Timeline:** Generational, forward-looking resilience.

# The Ultimate Bigger Picture

Malta Vision 2050 does not replace existing efforts. It is a strategic blueprint that brings over 30 separate sectoral strategies under one unified roof to maximize synergy and impact.

"A safe and resilient Nation, inspired by heritage and driven by progress, fostering a healthy quality of life for all."

# Built by the people. For the people.

1,000+ public surveys & sentiment analyses prioritizing work-life balance

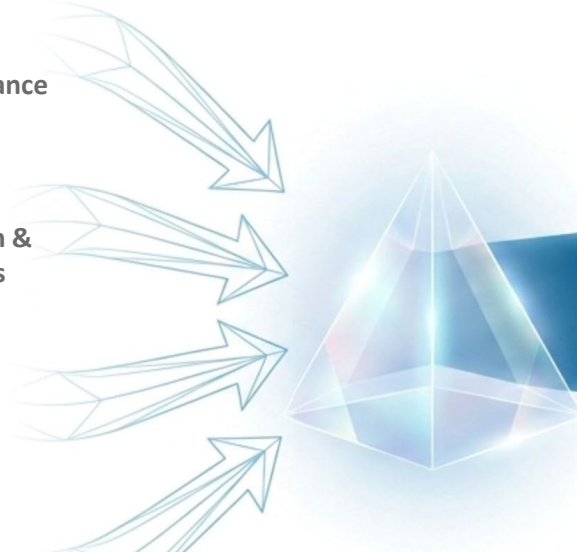

400+ participants at Envision 2050, plus youth & civil society consultations

15 major global macro-trends analyzed

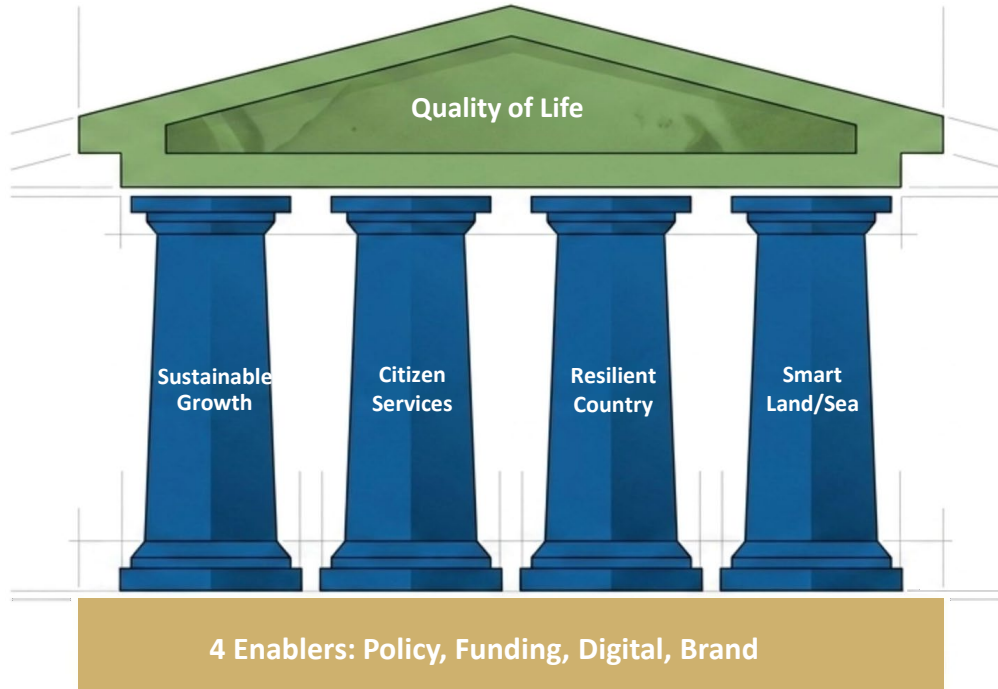

Benchmarking vs. top innovation-driven small nations (Singapore, Ireland, Denmark)

A Vision grounded in shared purpose and implementation reality.

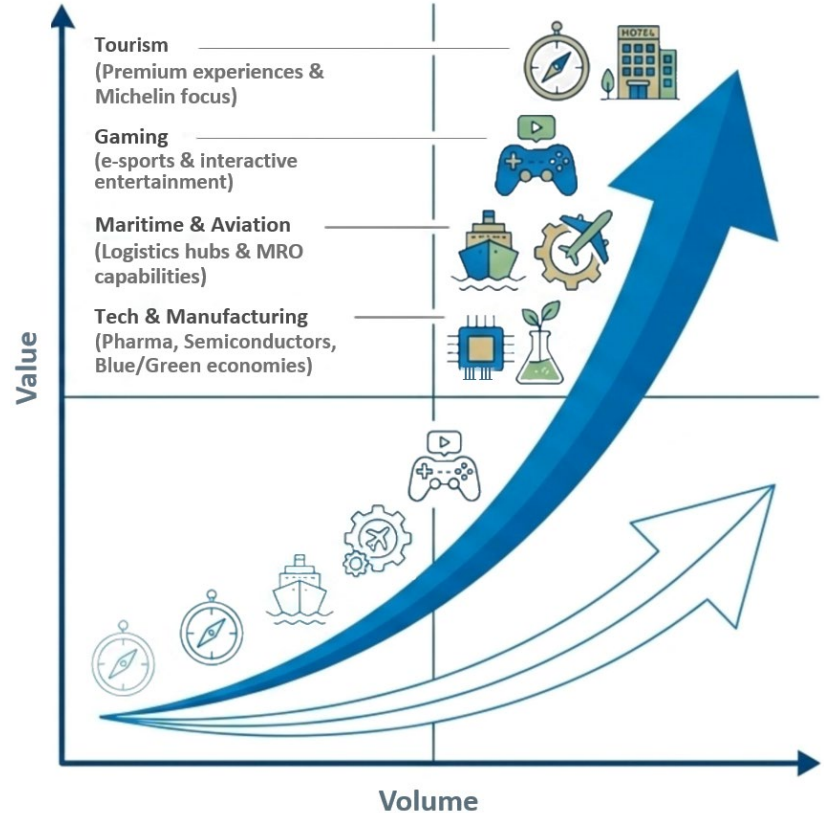

# The Architecture of 2050

How we translate aspiration into execution. Four strategic pillars uphold Malta's national well-being, supported by four crucial systemic enablers.

# Pillar 1: Growing Better, Not Just Bigger

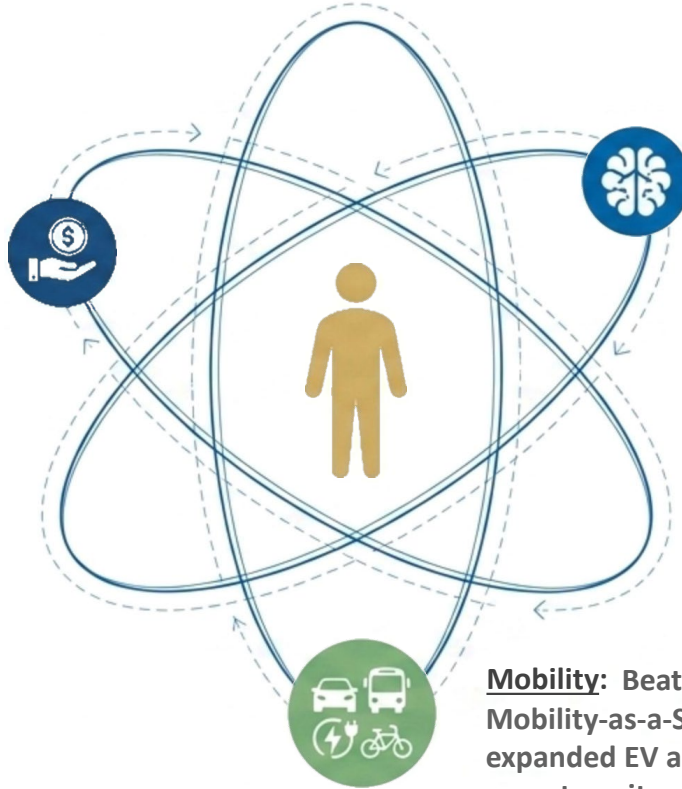

Moving away from progress measured solely by GDP, targeting a sustainable 5% annual GDP growth by 2035 through premium, high-value sectors.

# Pillar 2: Services that Revolve Around People

**Social Support:** Affordable housing, pension adequacy, and skills-based integration.

**Healthcare:** AI diagnostics, telemedicine, preventative care, and specialized workforce support.

**Mobility:** Beating congestion through Mobility-as-a-Service (MaaS) apps, expanded EV adoption, and green mass transit.

# Pillar 3: Built to Adapt. Built to Last.

**Modern Education:** Curriculum reform emphasizing STEM, lifelong learning, and alignment with Industry 4.0/5.0 demands.

**Environment:** Carbon neutrality targets, circular economy, and restoring coastal/rural ecosystems.

**Energy Security:** Accelerating the shift to renewables and strengthening regional interconnectivity.

**National Identity:** Preserving cultural heritage, digital security, and rebuilding public trust through transparency.

# Pillar 4: Making Every Square Meter Count

Malta's physical footprint is limited. We must balance development with deep environmental stewardship to respect the country's carrying capacity.

## Green Malta:

Expanding urban/rural green spaces and protecting agricultural land.

## Urban Planning:

Compact, livable communities guided by long-term spatial plans.

## Land Reclamation:

Cautiously explored, rooted strictly in sound environmental and economic assessments.

# The 4 Enablers: The Engines of Execution

## Policy:

Adaptive, transparent, and data-driven governance.

## Funding:

Smart, strategic allocation of public and EU investments.

## Digital:

Accelerated e-government, AI, and Digital Twin infrastructure.

## Brand:

A cohesive, unified global identity for Malta as a premium, sustainable destination.

# A Day in the Life: Malta 2035

**Morning:** Commute smoothly on a zero-emission mass transit network powered by real-time MaaS platforms.

**Day:** Work in a high-value, digitally advanced tech or green energy job, utilizing lifelong STEM skills.

**Evening:** Enjoy expansive, protected urban green spaces with family, knowing Malta's heritage and environment are secured.

Policies seamlessly intersect to create a Healthy Quality of Life

# Where Malta is heading: The 2050 Ambition

## Top 10

In the Global Human  
Development Index by 2050  
(Top 20 by 2035).

## Top 5

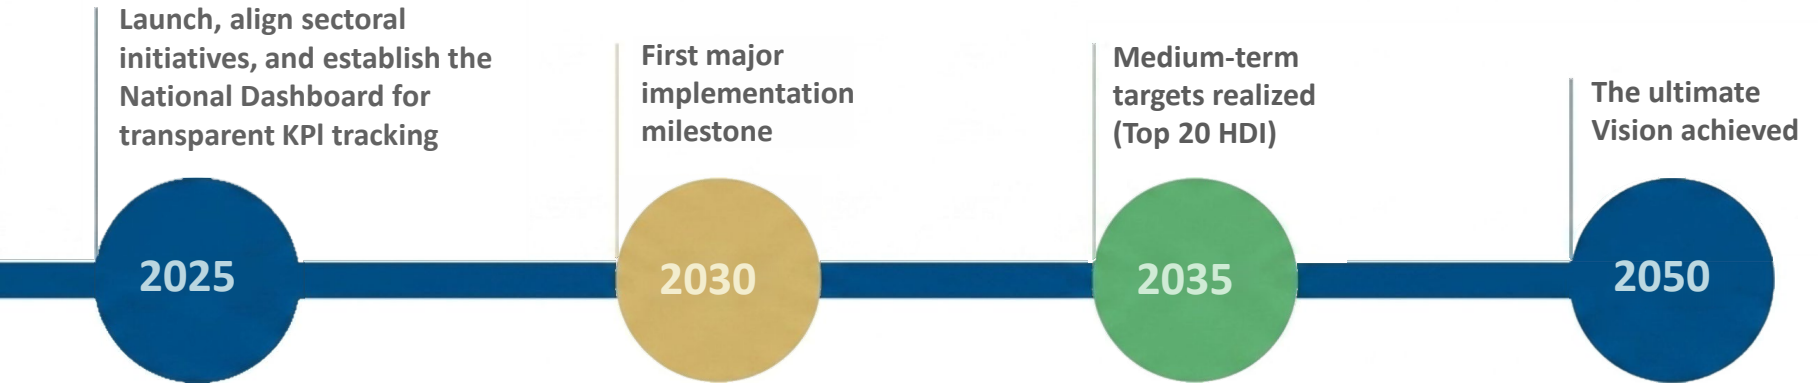

Among all EU countries for  
overall Life Satisfaction.

## 135%

Of the EU average for median  
disposable income by 2050  
(up from 93% in 2023).

# A vision is only as good as its execution

To ensure results, Malta Vision 2050 is governed by a dedicated Programme Management Office (PMO) ensuring cross-ministerial coordination.

# The future does not simply happen. It is built, shaped, and earned.

**Malta Vision 2050 is an open invitation. It relies on national ownership, collaboration, and courage.  
Engage with the process, imagine the Malta you want to see - and let's build it together.**
